667.3-4M/C  
A great deal of work is going on at the rocket experimental station at Peenemünde. Several projects are under way, based on the work of the inventor Lt. Gen. Dornberger. They are concerned with a V-2 type weapon (propelled by liquid fuel) for a range of 2,000 km. The importance of the weapon is lessened by the fact that heating of the rocket resulting from air resistance vastly lowers its accuracy.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1976 from the Director of Central Intelligence to the Archivist of the United States.
